-

Roles & Experience

Product & Business Analyst Consultant

Urso Core | Cancún, MX | May 2026 – Present

Independent consulting work helping small businesses define, build, and improve digital products, websites, AI-enabled workflows, and growth systems.

Key Contributions

- Translate business needs into clear requirements, user flows, scope, and implementation plans.
- Build and launch websites and digital experiences using SEO, structured data, analytics, HTML, CSS, JavaScript, and CMS tools.
- Work directly with business owners to prioritize scope, make tradeoffs, and move projects from idea to launch.

Product Owner / Senior Business Analyst — eCommerce Ordering & Reporting

HCLTech | Monterrey, MX | Sep 2024 – May 2026

Led product ownership and business analysis for a new eCommerce Reporting platform built from scratch to replace Legacy Oracle BI, partnering with Product Management, UX, Data Engineering, engineering leadership, QA, IT Support, Customer Experience, eCommerce SMEs, and National Sales stakeholders across internal users and external National Accounts.

Key Contributions

- Led gap analysis between Legacy Oracle BI and the new Reporting platform, translating business needs into Jira user stories, acceptance criteria, UI/UX flows, data requirements, and functional documentation in Confluence.
- Owned backlog readiness across 2-week sprints and quarterly PI Planning, ensuring developers had refined, prioritized, and dependency-aware work up to 3 months ahead.
- Partnered with UX, Product Management, Tech Leads, Architects, and Data Engineering to create and validate mockups with leadership, define reporting data requirements, and support dashboard/reporting solution design.
- Drove business user adoption and continuous improvement for the Legacy Oracle BI transition through release notes, functional documentation, IT Support enablement, Adobe Analytics reviews, feedback analysis, and structured feedback readouts.
- Used adoption data, support feedback, and stakeholder readouts to identify gaps, surface new requirements to leadership, reprioritize work, and quickly move high-impact improvements into mockups, stories, refinement, and planning.
- Served as Project Reporting Manager for HCLTech BA, Product, and UX team members on the account, supporting operational processes, administrative reporting, leadership communication, and account execution.

Sales Representative — Travel & Hospitality

Playa Hotels & Resorts | Cancún, MX | Feb 2024 – Aug 2024

Sales consultant for a high-end vacation club, focused on trust-building and persuasive communication. Worked in a high-pressure, target-driven environment requiring adaptability, empathy, and the ability to uncover dominant buying motives through structured discovery.

Key Contributions

- Conducted in-depth discovery sessions to identify customer needs and emotional drivers, tailoring pitches accordingly.
- Delivered persuasive sales presentations aligned with customer values, product benefits, and urgency triggers.
- Thrived under pressure in a fast-paced environment, consistently meeting sales expectations through preparation and rapport-building.

Product Manager / Business Analyst — EdTech & Internal Platforms

Red de Colegios Semper Altius | Mexico City, MX | Nov 2021 – Nov 2023

Led digital product delivery, internal tool modernization, and business analysis for a national education network serving 70+ campuses and over 90,000 students and staff. Acted as the sole client-side product and analysis lead, responsible for requirements gathering, vendor management, platform delivery, stakeholder alignment, and training.

Key Contributions

- Directed three major software development initiatives from discovery to launch, managing requirements, vendor selection, contracts, delivery timelines, and post-release adoption.
- Collaborated with cross-functional stakeholders to translate institutional needs into actionable product requirements.
- Delivered user onboarding and documentation; managed CMS and supported national Microsoft 365 operations across campuses.

Customer Service Coordinator — Food Manufacturing / Supply Chain

Harbar LLC | Remote | Sep 2020 – Nov 2021

Coordinated service operations for a US-based food manufacturer with major retail clients. Led documentation, system optimization, and process improvement across customer service, operations, and finance.

Key Contributions

- Managed EDI, ERP, and CRM systems for 110+ accounts, optimizing processes for clients like Trader Joe's, Walmart, and U.S. Government vendors.
- Created cross-department sales protocols and documentation that improved order processing speed and operational accuracy.
- Spearheaded the company's first on-time monthly financial closing; supported \$40M+ in annual order volume with high service quality.

Project Business Analyst — Seafood Industry / Logistics

Caiman Products | Yucatán, MX | Jul 2019 – Jul 2020

Led the development of a business intelligence system for a seafood distributor. Combined technical analysis, process optimization, and data modeling to improve efficiency across operations.

Key Contributions

- Designed and implemented a centralized system reducing manual reporting and Excel dependency.
- Enabled 20+ hours/week in time savings through system automation.
- Reduced physical infrastructure by 35% through cloud migration; improved same-day shipping processes.
